

INTELLIGENT FITNESS

COVID POLICY UPDATE

As a facility that prides itself in making sure our clients overall health and well being our top priority, we want to remain proactive in the ongoing battle with COVID-19. Although at this time there is a limited number of “requirements” for our facility to follow we want to make sure we continue to provide a safe place for all of our clients to workout. With that being said at this time Intelligent Fitness will ask that all Clients and Staff follow the guidelines below:

- If you are unvaccinated, we ask that you wear a mask for circumstances included in our previous protocols: (Entering and leaving the facility, while walking around IF, or engaging in conversation. Unvaccinated clients can still remove their masks while working out.)
- Trainers who are not vaccinated will wear masks while working with clients during their training & when in close proximity to clients.
- Out of courtesy, if a client is uncomfortable with a trainer (who is fully vaccinated) not wearing a mask, they can ask the trainer put a mask on.
- We will ask that all clients use our wristband program for the next few weeks as we re-determine clients & trainers comfort levels with the new CDC guidelines.
- We will be resuming classes to be In Your Own Place for the time being.
- We still ask that everyone wash or disinfect your hands when entering the facility & any time you feel necessary.
- We will continue to disinfect all of the equipment as we go.
- Please use hand sanitizer or wash your hands when entering & exiting & any other times you feel necessary. Stations are still all around the facility.
- If at any time, a trainer (whether fully vaccinated or not, regardless of the CDC guidelines) is feeling slightly unwell, but not to the level that they cannot work, they will wear their mask.

As always Thank you for your continued support and understanding as we navigate the unknown.
